That will empower our clients to aspire and succeed with business transformation and outstanding customer experience

Our mission to partner with our clients on accelerating their digital transformation initiatives and positioning their digital strategy for the new reality with next generation technologies

Vision

To be the best Digital Transformation (DX) partner for our clients, known for excellency and innovation, in enabling them as digital native enterprise

Technology **Solutions**

1 NextGen Cyber Security Solutions

Next-Gen cybersecurity solutions will help to achieve your mission and build cyber resilience from inside out

With the cyber threat landscape evolving at a rapid scale in a complexly growing environment, cybersecurity has become one of the top business risks. Are you prepared for the unexpected?

Our cybersecurity solutions and services are custom-designed to safeguard your business flow and data assets, ensuring that your business operations are protected and always available. Your cyber space are protected by our experienced experts in the field of technology, business logics and the threat vectors, that cyber criminals leverage in their attempts to gain access

We offer the complete range of cyber security solutions for operation technology (OT) and information technology (IT), includes Security consultation, monitoring, assessment, compliance, solution implementation and cloud security solutions

2 Cloud Solutions and Services

Cloud computing is a powerful enabler of digital transformation

The cloud is more than a technology platform. It's a catalyst for business transformation and growth. We'll work with you to define a business strategy, build a cloud roadmap, optimize your move to the cloud, and implement modern platforms for ongoing operational excellence. Wherever you are on your cloud journey, we brings curiosity, passion, and deep technical and strategic expertise to every cloud project

We can provide you cloud security, automated cloud-based data backups, disaster recovery and monitoring

Our partnership arms are well energized with AWS, Microsoft Azure and VMware VNF

Technology **Solutions**

3 NextGen Networking & Collaboration

Innovators have something in common: A next-generation network and collaboration platform

Your enterprise network and collaboration infrastructure is like the nervous system of your organization and it is a critical success factor for the business. As a Cisco Gold Partner, we are expert on design, implement and support the network and collaboration solutions, from the core infrastructure of the data center all the way throughout the edge network infrastructure, in the way that best meets your organization's need

4 Enterprise Data Storage Solutions

Data storage that takes you from insights to innovation

Transform and enhance your business with a comprehensive storage solutions

Get the scalability, intelligence, and cloud integration you need to unlock the value of your data. Accelerate your critical workloads from core to edge to cloud while decreasing application outages and reducing storage requirements with advanced deduplication

We have the real-world experience and expertise to design and build enterprise-class data storage infrastructure that operates at the highest levels of performance and reliability, regardless of the complexity of the mission requirement

We can help you to design, build and manage the most challenging of data storage, backup, availability and recovery infrastructures in partner with most respected technology vendors in the world

5 Business Intelligence and Data Warehousing

Real-time decision making require a modern data architecture

Effective decision-making processes in business are dependent upon high-quality information availability. That's a fact in today's competitive business environment that requires agile access to a data storage warehouse, organized in a manner that will improve business performance, deliver fast, accurate and relevant data insights

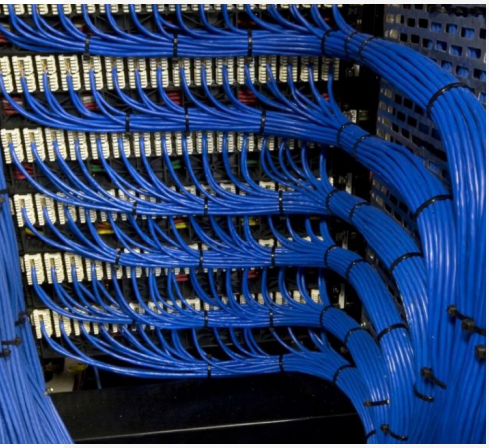
Our BI and Data Warehousing services enable clients to harness data and effectively derive valuable business insights. With our deep-domain expertise and rich experience, we provide meaningful solutions that enable our customer for high quality business decisions and sustainable growth

Technology **Solutions**

6 Enterprise Mobility

Stay Connected, Competitive and create better customer experiences

Mobility is a critical component for businesses today that want anywhere and anytime access to resources and people through seamless integration and flexible connectivity options. Our approach to mobility solutions provides a fresh perspective. Using consultancy-led engagements, we deliver customized mobility strategies that offer real business benefits



7 Structured Cabling

A well-designed cabling infrastructure can provide long savings on OPEX, greater business continuity, scalability and resilience

Structured Cabling provides a single unified solution that encompasses data, voice and video allowing all building systems to use the one cabling infrastructure – vastly reducing costs

As a leading provider of end-to-end structured cabling solutions, we offer the experience and expertise to turn your cable infrastructure into a strategic business asset

8 Hospitality Solutions

Smart Hotel Solutions - Better customer experience @ Lower operating costs

Managing a successful hospitality business requires building a loyal customer base in which guests view you as the "host with the most." Guests need multiple network services, including Highspeed internet, Telephone, Video-on-demand, Video conferencing, Internet Protocol Television (IPTV) and the operator need of Property Management System (PMS), Digital signage system, Video surveillance and security services, etc.

Over 15 years' of experience on the same, we can provide end-to-end hospitality solution, to turn your service infrastructure into a strategic business asset. Our innovative design strategies, provide a quick and clear path for upgrades and expansions, that keep you future-ready

Empowering **Services**

Consulting and Design

Our consulting and professional services can add value to your business by providing insights, strategy, architecture, implementation and integration services to accelerate your digital transformation journey

We provide these services across all range of our technology solutions

We work with our clients to architect a holistic solution that integrates new technologies with the legacy environment, in line with your business strategy. As a digital transformation partner, we can help you on achieving your long term business goal

Deployment & Integration

Deploying new technologies and integrating them with existing infrastructure is a challenge for any organization. Our engineers fully understand the inter-dependencies and potential issues of integrating new technology with your existing systems. We take a unique approach through strategy, design, engineering and project management to insure that your project is implemented on time and within the budget

Remote infra. Management and Technical Support

Remote infrastructure management (RIM) is the process of monitoring and managing IT infrastructure (data center, networks, storage, server, telephony, OS, security, applications and support services) from a remote location with the ability to perform remedial actions to enable continuous availability

RIM enables to reduce IT expenditures and gain faster, more flexible services from the experts team. We combine our leading technological expertise with deep industry knowledge to offer the best

Procurement & Logistics

Procurement and logistics have been our core competencies since our doors opened in 2006. We help clients to assess their business needs, source, acquire, configure and deploy the best technology solution at the best price through our top tier technology partnerships

Our Partners

We have partner-ecosystem built to deliver superior business value based on best-in-class technology. We work hand-in-hand with selected world class technology vendors. It's the best way to strengthen our unique portfolio in the areas of consulting, solutions and services. Leveraging complementary capabilities allows us to add superior value to our customers

Our Customers

'Customer-First' approach guides us everything we do

We partner with our customers to deliver the most innovative and the best business technology solutions. We strive for excellence and measure our success by adding value to our customers
