GBS

CELEBRATING

20
YEARS

A LEGACY OF SUCCESS

About **GBS**

Over 20 years of experience have established Global Business Solutions Co. Ltd. (GBS) as a trusted digital transformation partner, delivering integrated IT, cybersecurity, cloud, AI, and automation solutions. GBS enables organizations to become agile, secure, and future-ready enterprises through innovation, deep expertise, and measurable business outcomes.

Our mission to partner with our clients on accelerating their digital transformation initiatives and positioning their digital strategy for the new reality with next generation technologies

Vision

To be the best Digital Transformation (DX) partner for our clients, known for excellency and innovation, in enabling them as digital native enterprise

Technology Solutions

1 NextGen Cyber Security Solutions

End-to-End Cybersecurity. Locally Delivered.
Globally Trusted

With the cyber threat landscape evolving at an unprecedented pace within an increasingly complex environment, cybersecurity has become one of the most critical business risks. Are you prepared for the unexpected?

Our cybersecurity solutions and services are custom-designed to safeguard your business operations and data assets, ensuring continuity, resilience, and high availability. Your digital ecosystem is protected through our Security Operations Center (SOC) and experienced experts who understand technology, business logic, and the threat vectors cybercriminals exploit to gain unauthorized access.

We deliver a comprehensive range of cybersecurity solutions for both Operational Technology (OT) and Information Technology (IT), including security consulting, SOC monitoring, risk assessment, compliance, solution implementation, and cloud security services.

2 Cloud Solutions and Services

Cloud computing is a powerful enabler of digital transformation and business agility.

The cloud today is more than a technology platform it is a foundation for innovation, scalability, and AI-ready operations. We work with organizations to define cloud strategies, build hybrid and multi-cloud roadmaps, modernize applications, and optimize cloud adoption to achieve operational excellence. Wherever you are on your cloud journey, GBS brings expertise, automation, and strategic insight to every cloud initiative.

We provide cloud security, automated cloud-based backups, disaster recovery, cost optimization, and continuous monitoring to ensure secure and resilient operations. Our cloud practice is strengthened through strategic partnerships with Amazon Web Services (AWS), Microsoft Azure, and Google Cloud.

3 NextGen Networking & Collaboration

Innovators have something in common: A next-generation network and collaboration platform

Your enterprise network and collaboration infrastructure is like the nervous system of your organization and it is a critical success factor for the business. As a Cisco Gold Partner, we are expert on design, implement and support the network and collaboration solutions, from the core infrastructure of the data center all the way throughout the edge network infrastructure, in the way that best meets your organization's need

4 Enterprise Data Management Solutions

Intelligent data foundations that power resilience, performance, and growth

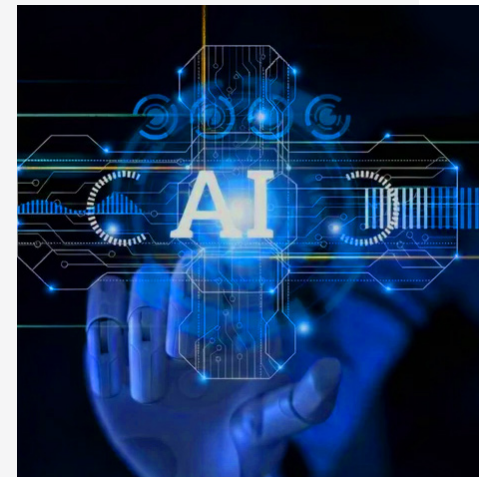

GBS delivers Enterprise Data Management Solutions that provide secure, scalable platforms to store, process, and protect critical business data. Our capabilities span enterprise computing, high-performance storage, intelligent backup, disaster recovery, and modern data center infrastructures—ensuring availability, performance, and continuity across on-premises, hybrid, and cloud environments.

Designed to meet evolving business demands, our solutions enable efficient data access, lifecycle management, and protection, empowering organizations to maximize the value of their data and support informed, data-driven decisions in today's dynamic digital landscape.

5 AI & Automation Solutions

Turning intelligence into action, efficiency, and growth.

GBS delivers intelligent AI and Automation solutions designed to transform how organizations operate, decide, and scale. Our expertise spans the design and implementation of scalable automation frameworks that streamline business processes, enhance operational efficiency, and enable data-driven decision-making. From intelligent workflow automation and AI-powered analytics to system integration and process optimization, GBS's AI & Automation solutions empower organizations to accelerate digital transformation, improve productivity, and achieve sustainable, future-ready performance in an increasingly dynamic business environment.

6 Enterprise Mobility

Stay Connected, Competitive and create better customer experiences

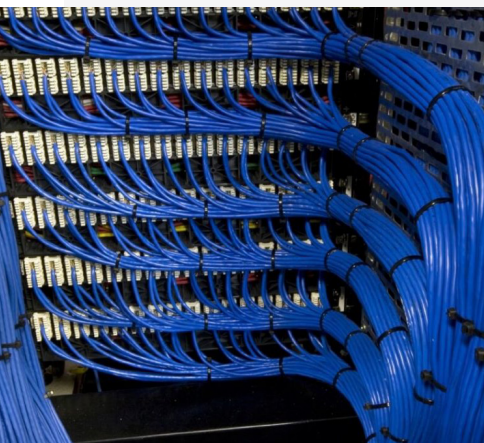

Mobility is a critical component for businesses today that want anywhere and anytime access to resources and people through seamless integration and flexible connectivity options. Our approach to mobility solutions provides a fresh perspective. Using consultancy-led engagements, we deliver customized mobility strategies that offer real business benefits

7 Enterprise Connectivity Solutions

A well-engineered cabling infrastructure is the foundation of a resilient, scalable, and cost-efficient enterprise.

GBS delivers end-to-end structured cabling solutions, covering both copper and fiber networks, to support data, voice, video, and building systems on a unified platform. With proven expertise, we transform cabling infrastructure into a future-ready business asset that enhances performance, continuity, and long-term operational efficiency.

8 Hospitality Solutions

Smart hospitality platforms that enhance guest experience while optimizing operations.

Today's hospitality industry demands intelligent, connected, and secure digital experiences across the entire guest journey. Guests expect seamless connectivity, personalization, and digital convenience, while operators require scalable platforms that improve efficiency and control costs.

GBS delivers end-to-end hospitality solutions integrating high-speed wired and wireless networks, cloud-based PMS, guest Wi-Fi, IPTV, VoIP, digital signage, smart room technologies, analytics, automation, video surveillance, and cybersecurity. With over 20 years of experience, we design future-ready hospitality platforms that elevate guest satisfaction, enable data-driven operations, and transform service infrastructure into a strategic business asset.

Empowering Services

Consulting and Design

Our consulting and professional services can add value to your business by providing insights, strategy, architecture, implementation and integration services to accelerate your digital transformation journey

We provide these services across all range of our technology solutions

We work with our clients to architect a holistic solution that integrates new technologies with the legacy environment, in line with your business strategy. As a digital transformation partner, we can help you on achieving your long term business goal

Deployment & Integration

Deploying new technologies and integrating them with existing infrastructure is a challenge for any organization. Our engineers fully understand the inter-dependencies and potential issues of integrating new technology with your existing systems. We take a unique approach through strategy, design, engineering and project management to insure that your project is implemented on time and within the budget

Remote infra. Management and Technical Support

GBS delivers proactive Remote Infrastructure Management (RIM) and technical support to ensure continuous availability, performance, and security across IT environments. Our services cover data centers, networks, servers, storage, operating systems, applications, and security platforms, supported by advanced monitoring and rapid remediation. By combining automation with expert support, GBS reduces operational costs, improves service responsiveness, and enables resilient, always-on infrastructure operations.

Procurement & Logistics

Procurement and logistics have been our core competencies since our doors opened in 2006. We help clients to assess their business needs, source, acquire, configure and deploy the best technology solution at the best price through our top tier technology partnerships

Our Partners

We have partner-ecosystem built to deliver superior business value based on best-in-class technology. We work hand-in-hand with selected world class technology vendors. It's the best way to strengthen our unique portfolio in the areas of consulting, solutions and services. Leveraging complementary capabilities allows us to add superior value to our customers

Our Customers

'Customer-First' approach guides us everything we do

We partner with our customers to deliver the most innovative and the best business technology solutions. We strive for excellence and measure our success by adding value to our customers
