OUR STORY

Since 2006, GBS has empowered organizations to accelerate their digital transformation journey, enabling them to become secure, intelligent, and future-ready enterprises. By combining innovation-driven strategies, advanced technologies, and deep industry expertise, we deliver scalable technology solutions that enhance operational efficiency, accelerate growth, and create long-term business value.

Over nearly two decades, we have earned the trust of customers across diverse industries by consistently delivering excellence through innovation, technical expertise, and an unwavering commitment to customer success.

WHAT •• DRIVES •• US? ••

VISION

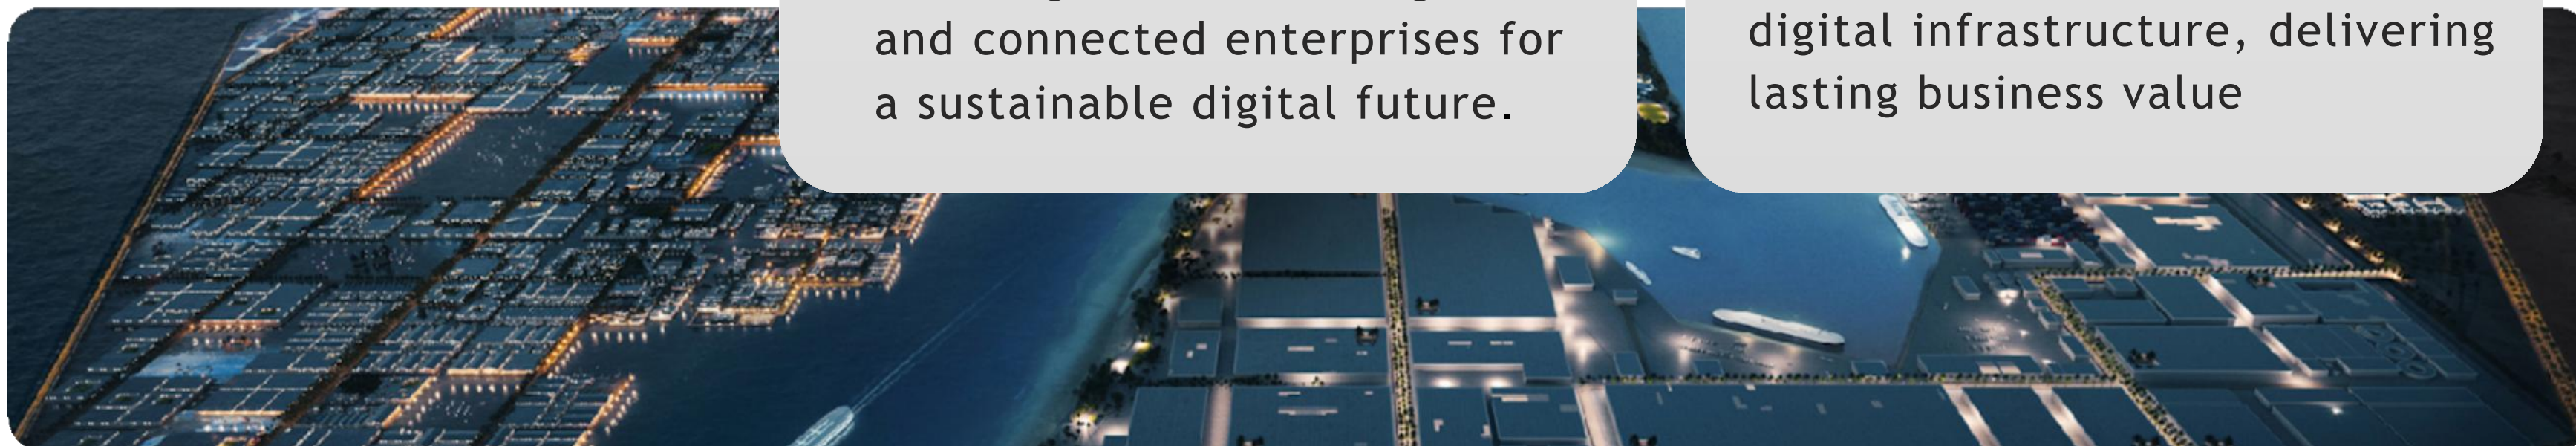

To be Saudi Arabia's most trusted digital transformation and technology partner, enabling secure, intelligent, and connected enterprises for a sustainable digital future.

MISSION

Empowering organizations with secure, scalable technology solutions in cybersecurity, cloud, AI, automation, and digital infrastructure, delivering lasting business value

OUR APPROACH

Discover & Plan

A thorough evaluation of your issue to determine needs & identify areas for improvement

Solution Design

Creation of fitting strategy to meet your unique needs.

Implementation

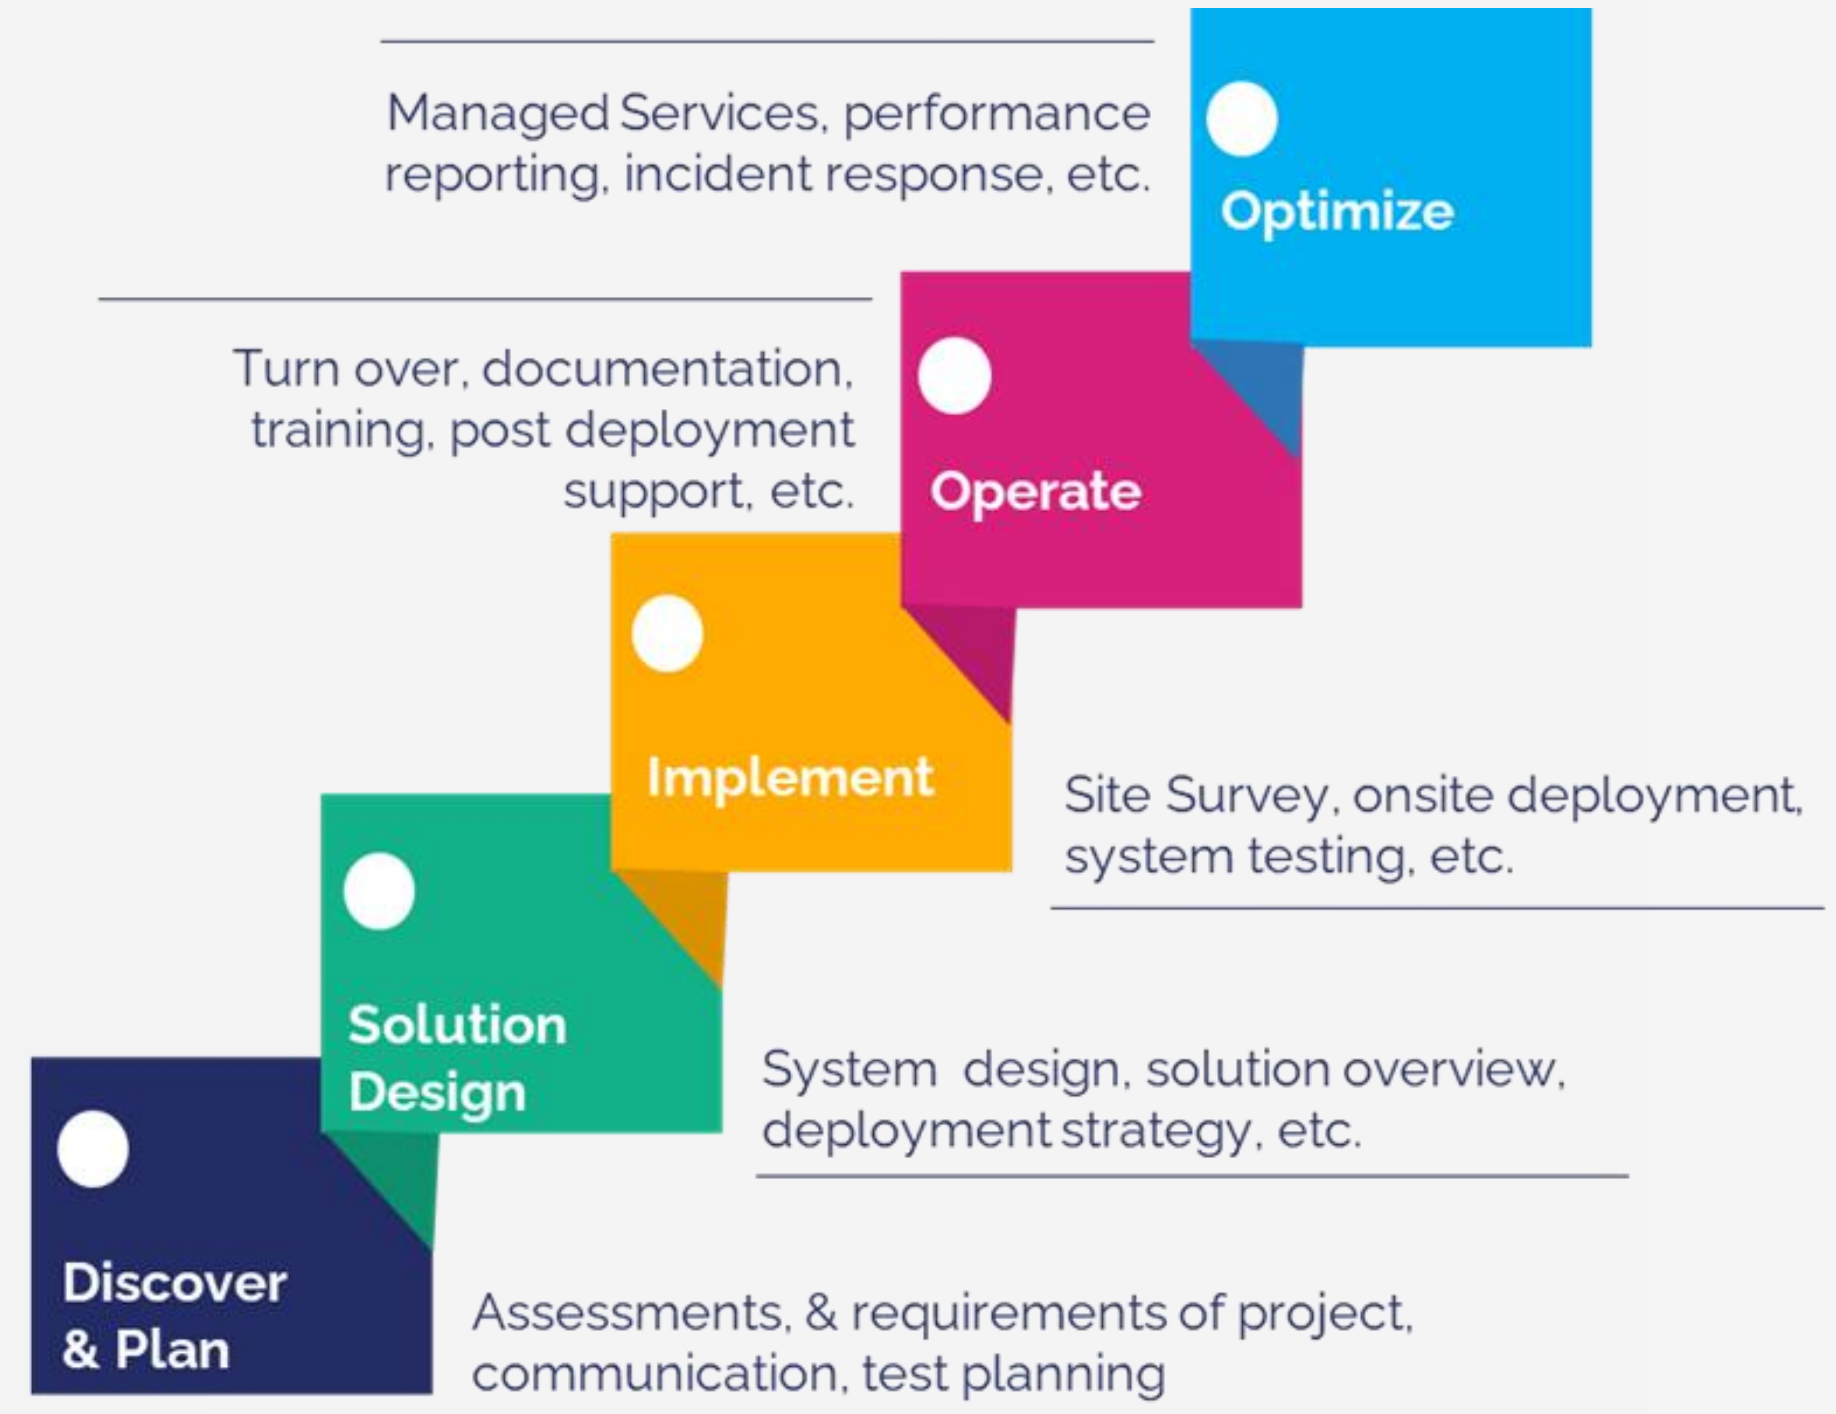

Deployment of technology solutions & managed services to resolve & improve.

Operate

Provide support with regular reporting & analytics of your IT infrastructure & performance.

Optimize

Scalable solutions and flexible service delivery options to adapt to changing business needs.

Network Switching

Scalable, fabric-based designs (VXLAN, EVPN).

Cloud Networking

Centralized, cloud-managed agility.

SASE & SD-WAN

Unified, secure, cloud-optimized WAN.

Wireless Networking

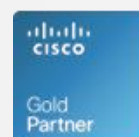

Wi-Fi 6/6E with AI optimization.

WAN Acceleration

Boost ERP/CRM performance.

Partners:-

Digital Workplace S Collaboration Services

Hybrid Collaboration Platforms

- Empower teams to connect seamlessly across locations with Cisco Webex, Microsoft Teams, and Zoom.
- GBS enables secure cloud calling, video meetings, and integrated collaboration experiences for hybrid workforces.

Enterprise Voice & UC Solutions

- Deploy and manage reliable on-premises and hybrid communication systems with Cisco WebEx CUCM and Avaya.
- Experience enterprise-grade voice, mobility, and interoperability designed for business continuity.

Contact Center Experience

- Enhance customer engagement through AI-enabled, omnichannel contact center platforms.
- GBS designs and manages scalable solutions across Cisco WebEx, Genesys, Zoom, Avaya, and other cloud-native technologies.

Meeting Room & AV Modernization

- Transform physical workspaces into intelligent collaboration hubs.
- From huddle rooms to executive boardrooms, GBS integrates video conferencing, AV automation, and scheduling solutions powered by Cisco WebEx, Microsoft, Poly, and Zoom..

Partners:-

Data Management

VMWARE Solutions

- Anywhere Workspace (Horizon and Workspace)
- Cloud Management (Aria, Cloud Health, skyline)
- App Platform (Tanzu)
- Cloud G Edge Infrastructure (SDWAN, SASE, vSAN and cloud foundation).
- Security G Networking (Carbon Black and NSX)

Nutanix Cloud Infrastructure (NCI)

- AOS Storage
- AHV Virtualization
- Nutanix Kubernetes Engine
- Nutanix Disaster Recovery
- Flow Network Security
- Nutanix Cloud Clusters (NC2)
- Nutanix Disaster Recovery as a Service (DRaaS)

Structured Cabling (Fiber & UTP)

GBS designs, installs, and certifies high-performance copper (UTP/STP) and fiber optic networks that meet ISO/IEC, ANSI/TIA, and BICSI standards—ensuring reliability, scalability, and simplified lifecycle management across enterprise and data center environments. We provide Cable-management systems (pathways, labeling, lifecycle traceability) and Certification testing of every copper G fiber link to ISO/IEC G TIA standards. We also provide End-to-end integration with active network components for seamless turn-up.

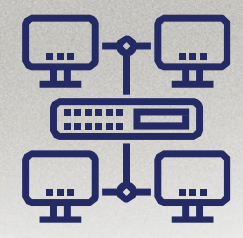

CCTV & Video Surveillance

Enhance security and operational visibility with intelligent video surveillance systems. GBS delivers IP-based CCTV solutions integrated with AI analytics, facial recognition, and centralized Video Management Systems (VMS) from leading manufacturers. Our solutions enable real-time monitoring, proactive incident detection, and unified control across facilities and critical infrastructure.

Access Control & Physical Security

Safeguard assets, personnel, and data with modern access control platforms. GBS implements credential-based, biometric, and mobile access systems that integrate seamlessly with CCTV and building management environments. Our scalable, standards-compliant designs ensure secure, centralized control for organizations of any size.

Datacenter Solutions (Modular & Traditional)

Delivering the core infrastructure powering business-critical operations. GBS designs and builds both traditional and modular datacenters with full integration of power, cooling, cabling, racks, and monitoring systems. Our modular solutions enable faster deployment and scalability, while traditional builds emphasize redundancy, resilience, and energy efficiency aligned with Uptime Institute and TIA-942 standards.

Cloud Assessment

Our cloud assessment provides a comprehensive analysis of your current infrastructure & offers a roadmap for potential solution.

Cloud Migration

Protect your business from potential data breaches & loss with our reliable & secure cloud backup & security services.

Cloud Optimization

We focus on proactive monitoring & management of your cloud infrastructure to ensure optimal performance.

Cloud Backup & Security

Our expert team will assess, plan & execute a seamless migration strategy tailored to your specific needs, minimizing downtime & ensuring data security.

Cloud Operations & Management

Our experts analyze your current cloud environment, identify areas of inefficiency, & implement optimizations to improve performance, reduce costs, & ensure scalability.

Power Automate

Streamline repetitive tasks with automated workflows across 1,000+ apps like Outlook, SharePoint, and Dynamics, boosting efficiency and consistency.

Power Apps

Quickly build custom, mobile-ready apps with low/no code. Digitize forms, connect to data sources, and improve reporting.

Power BI

Gain real-time visibility with dashboards, KPIs, and analytics for informed decisions and continuous improvement.

Azure AI & Logic Apps

Enable intelligent insights with OCR, sentiment analysis, NLP, and seamless system integration for secure, scalable automation.

Copilot & Copilot Studio

Harness generative AI for reports, meeting summaries, and tailored AI agents that understand business context.

Partners:-

Cyber Security Solutions

Perimeter & Network Security

- We offer a comprehensive range of solutions, including NGFW, WAF, NAC, and Zero Trust, to secure networks and applications.

SaaS Security

- GBS delivers Email gateways, CSPM, CASB, workload protection for Azure/AWS/GCP, and more.

Identity & Access Management

- Explore our IAM, MFA, and PAM for secure access control.

Endpoint & Data Security

- We offer EDR, DLP, asset management, and mobile threat defense.

Testing & Governance

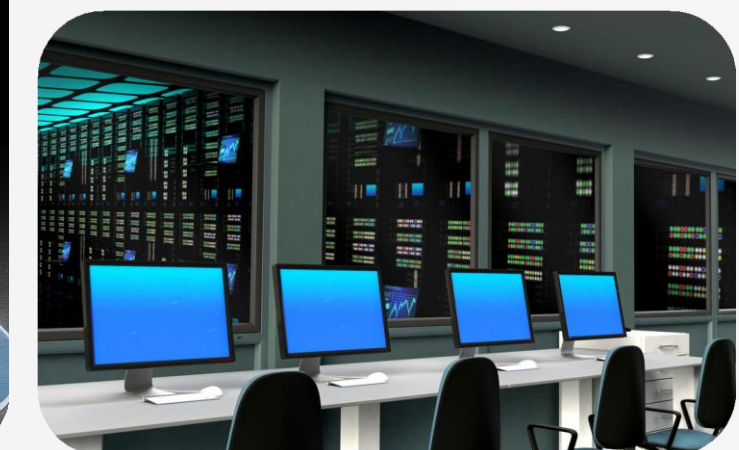

- VAPT, awareness training, and GRC compliance.

Industry-Specific

- Our solutions enable OT/SCADA and critical infrastructure security.

Advisory Services

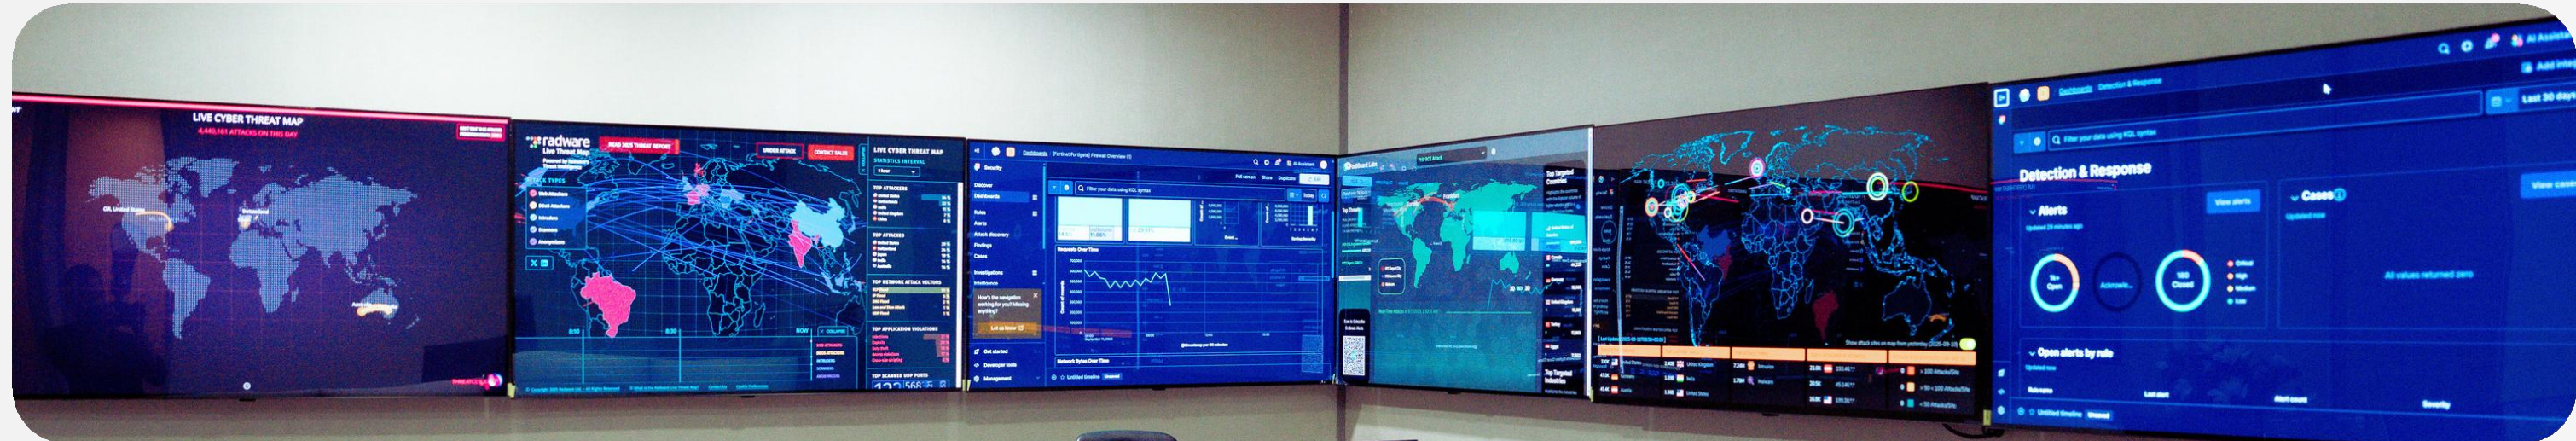

- Security design, compliance, and incident response readiness.

**Certifications
S Standards:-**

Security Operations Center

Security Monitoring & Response

We offer a Continuous detection, incident handling, and emergency support.

Threat Hunting & Intelligence

We delivers Proactive attack vector mapping, IT and OT coverage, and red team assessments..

SIEM & SOAR Expertise

Explore our Splunk, QRadar, Sentinel, ELK, workflow automation, and playbook development..

Forensics & Testing

We offer a comprehensive Data/network forensics, pentesting for apps, databases, and networks.

Infra-structure & Compliance

Experience Secure ops, architecture consulting, and adherence to NCA, HIPAA, PCI DSS, SAMA, NESAs, GDPR.
